### To Whom It May Concern

#### Mr. Sunit Patel

Mr. Sunit Patel is a geologist with whom I worked when I served as a director of Chaarat Gold Holdings Ltd, where my role was largely on the technical aspects of the Company's business. As such, I had a very close working relationship with Sunit in his role as Vice President, Geology at the Chaarat gold project in Western Kyrgyzstan. Sunit made a major contribution to the company and the project, as an extremely hard working and dedicated leader of the exploration team. He has excellent geological and exploration skills. His background, prior to this engagement was largely in mineral resource estimates, geostatistics and computer based geology. Not only did he continue with these duties to an exceptionally high standard, but adapted to all other aspects of the project activities and operations as well as the disparate requirements of the leadership role. This was no small achievement as the operating environment was remote, arduous and required developing a refined model of the mineralization controls of the gold deposit. This he undertook and accomplished very successfully and was particularly accomplished at managing and motivating a large staff under his control, which were of different nationalities and cultures, at all time leading by example.

Sunit is an extremely pleasant person with whom to work, with exemplary ethical standards, integrity, honesty and is enthusiastic and determined at all times and is a true professional and gentleman. He has a keen knowledge of geology and the mining industry, rapidly understands the requirements of any assignment and carries out his work to a very high professional standard.

I would recommend Sunit to any person or company.

**Stuart Comline**

M.Sc, B.Sc Hons (Geology)

Director Talon Metals Corp

Previously Director, Chaarat Gold Holdings Ltd; Chairman, AfriOre Limited; General Manager Geology, JCI Ltd
